## Solutions to New Year's Resolutions

As we welcome the New Year, we welcome a time of reflection and self-assessment. We have a new opportunity to do something we love, to meet a new challenge, to set a goal, no matter how small or large, and tackle it head-on without hesitation. This is where New Year's Resolutions come into play. Some people see them as meaningless, while others plan their entire year around them. But no matter your age or stage in life, there is always room for optimism and positive thoughts. If you are trying to think of a few resolutions and coming up short, here's some fodder to consider:

- How much time do I spend with my family? How are our relationships? Is there anyone with whom I'd like to be closer, or I've distanced myself from and should make amends?
- Could I spend more time doing other things besides sleeping and eating? What's my TV to reading ratio? Maybe I could go outside more often?
- I am retired, so I should have hobbies; right? What are they? Maybe I should get a new one? Make a new friend? Learn how to play a new game?

Now that you've considered some of these questions, you might be inspired to make a resolution, seek out a solution, learn something new, or mix up your daily routine. Regardless, do what makes you happy. Continue to age with ease and grace. Stay connected with loved ones, whether it's by exchanging letters regularly or learning to use the Internet. Make sure family traditions stay traditions. Share your recipes and war stories. Let your family learn from your experiences.

# Memories at TPC Parkway

## Holiday Open House

Happy  
New Year!

## Dollars and Sense

On January 4, 1999, the euro debuted as the new form of currency used in 11 European nations, by approximately 300 million people. It was finally produced and put into use following more than 30 years of debate by leaders of the European Union. Its first day of trading blew the markets away, as analysts hoped it would eventually surpass the dollar as the world's main currency reserve. In its first day of use, the euro helped the European stock markets soar above the American dollar. The euro comprises seven paper bills, along with eight coins. Currently, the euro appears in various forms, as the bills and coins are marked with symbolic images of European unity, architectural imagery and themes from the countries that use it as the primary form of currency.

## Accidental Inventions

Sometimes when plans go awry the result can change the world. Coca-Cola was created as a medicinal remedy and Charles Goodyear made no secret that his process for rubber was discovered randomly. The following are some other products that are life-changing discoveries

**Artificial Sweeteners:** In 1879 a chemist named Constantin Fahlberg worked with coal tar. He finished his work and went home for dinner without stopping to wash up. While dining he noticed that everything he ate had a distinctly sweet taste and realized his hand residue was the source.

**Microwave Ovens:** In 1945 a Raytheon engineer was experimenting with a device called a magnetron, a tube used as part of military radar systems. As he was working, he noticed a candy bar in his pocket melting. The first microwave was built in 1947 and was more than 5 feet tall and cost around \$5,000.

**Silly Putty:** In 1943 James Wright an inventor employed by General Electric, was trying to create a synthetic rubber substitute during WWII. As a fake rubber, the goo was a failure, but Wright shopped around his creation and a toy shop owner came up with the idea to market it to kids.
